

## Assignment -4

### Ultrasonic Sensor in Wokwi

Assignment Date	22 October 2022
Student Name	Mr. S. Rama Krishnan
Student Roll Number	911019104017
Maximum Marks	2 Marks

#### Question-1:

Write code and connections in wokwi for the ultrasonic sensor. Whenever the distance is less than 100 cms send an "alert" to the IBM cloud and display in the device recent events.

#### Solution code:

```
#include <WiFi.h> //library for wifi
#include <PubSubClient.h> //library for MQTT
#define ORG "q1wscz"
#define DEVICE_E "sampledevice"
#define DEVICE_D "24052002"
#define TOKEN "K9)II1C@tX6yO(J6L1"

const int T_PIN = 5;
const int E_PIN = 4;

//----- Customise the above values -----

char server[] = ORG ".messaging.internetofthings.ibmcloud.com"; // Server Name
char publishTopic[] = "iot-2/evt/Data/fmt/json"; // topic name and type of event perform and
format in which data to be send
char subscribtopic[] = "iot-2/cmd/test/fmt/String"; // cmd REPRESENT command type
AND COMMAND IS TEST OF FORMAT STRING
char authMethod[] = "use-token-auth"; // authentication method
char token[] = TOKEN;
char clientId[] = "d:" ORG ":" DEVICE_E ":" DEVICE_D; //client id

//-----

WiFiClient wifiClient; // creating the instance for wificlient
PubSubClient client(server, 1883, wifiClient); //calling the predefined client id by passing
parameter like server id, port and wificredential

void setup() {
```

```

Serial.begin(115200);
pinMode(T_PIN, OUTPUT);
pinMode(E_PIN, INPUT);
wificonnect();
mqttconnect();
}

float readDistanceCM() {
    digitalWrite(T_PIN, LOW);
    delayMicroseconds(2);
    digitalWrite(T_PIN, HIGH);
    delayMicroseconds(10);
    digitalWrite(T_PIN, LOW);
    int duration = pulseIn(E_PIN, HIGH);
    return duration * 0.034 / 2;
}

void loop() {

    float distance = readDistanceCM();
    Serial.print("Measured distance: ");
    Serial.println(distance);
    if(distance<=100){
        PublishData(distance);
    }

    delay(1000);
    if (!client.loop()) {
        mqttconnect();
    }
}

void PublishData(float distance) {

```

```

mqttconnect();//function call for connecting to ibm
/*
    creating the String in in form JSon to update the data to ibm cloud
*/
bool status=true;
String payload = "{\"ALERT_MESSAGE\":\"";
payload += status;
payload += ", \"DISTANCE\":\"";
payload += distance;
payload += "\"}";

Serial.print("Sending payload: ");
Serial.println(payload);

if (client.publish(publishTopic, (char*) payload.c_str())) {
    Serial.println("Publish ok");// if it sucessfully upload data on the cloud then it will print
    publish ok in Serial monitor or else it will print publish failed
} else {
    Serial.println("Publish failed");
}

}

void mqttconnect() {
    if (!client.connected()) {
        Serial.print("Reconnecting client to ");
        Serial.println(server);
        while (!client.connect(clientId, authMethod, token)) {
            Serial.print(".");
            delay(500);
        }

        initManagedDevice();
    }
}

```

```

    Serial.println();
}
}

void wificonnect() //function defination for wificonnect
{
    Serial.println();
    Serial.print("Connecting to ");

    WiFi.begin("Wokwi-GUEST", "", 6); //passing the wifi credentials to establish the
connection

    while (WiFi.status() != WL_CONNECTED) {
        delay(500);
        Serial.print(".");
    }
    Serial.println("");
    Serial.println("WiFi connected");
    Serial.println("IP address: ");
    Serial.println(WiFi.localIP());
}

void initManagedDevice() {
    if (client.subscribe(subscribetopic)) {
        Serial.println((subscribetopic));
        Serial.println("subscribe to cmd OK");
    } else {
        Serial.println("subscribe to cmd FAILED");
    }
}
}

```

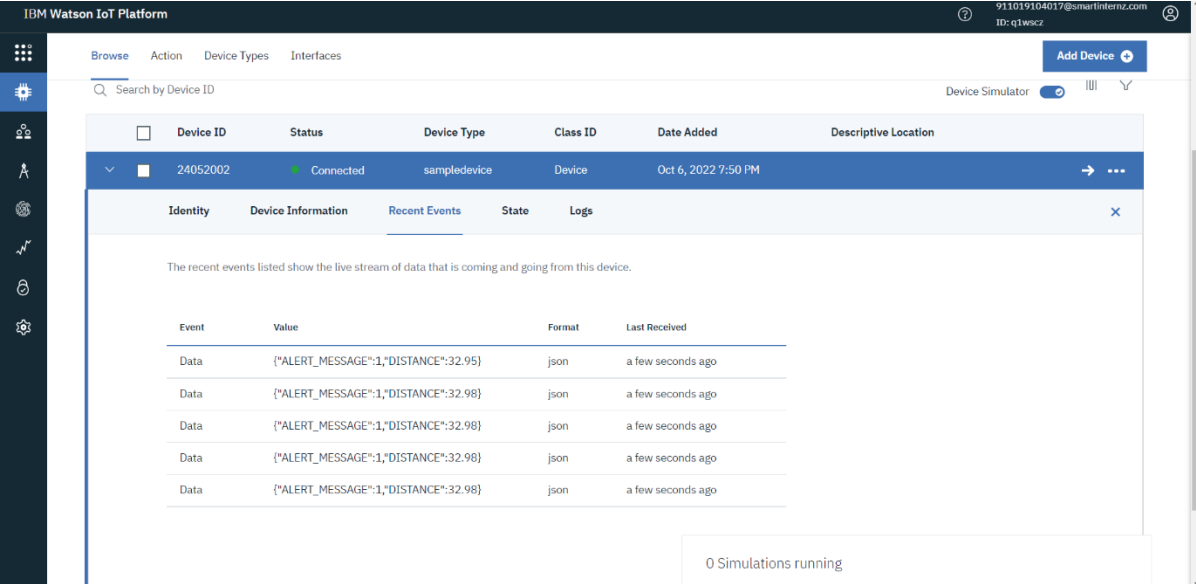

## Output:

The screenshot shows a simulation environment with an ESP32 microcontroller and an HC-SR04 ultrasonic sensor connected by wires. The console output displays the following sequence of events:

```
Publish ok
Measured distance: 18.94
Sending payload: {"ALERT_MESSAGE":1,"DISTANCE":18.94}
Publish ok
Measured distance: 18.94
Sending payload: {"ALERT_MESSAGE":1,"DISTANCE":18.94}
Publish ok
```

## IBM Cloud Image:

The screenshot displays the IBM Watson IoT Platform interface. The device with ID 24052002 is shown as 'Connected'. The 'Recent Events' tab is active, showing a stream of data events. The events are as follows:

Event	Value	Format	Last Received
Data	{"ALERT_MESSAGE":1,"DISTANCE":32.95}	json	a few seconds ago
Data	{"ALERT_MESSAGE":1,"DISTANCE":32.98}	json	a few seconds ago
Data	{"ALERT_MESSAGE":1,"DISTANCE":32.98}	json	a few seconds ago
Data	{"ALERT_MESSAGE":1,"DISTANCE":32.98}	json	a few seconds ago
Data	{"ALERT_MESSAGE":1,"DISTANCE":32.98}	json	a few seconds ago
